

BECOME A CERTIFIED PURE AIR INDOOR ENVIRONMENT

Ensure A HEALTHIER BUILDING

Partner with Pure Air Control Services for methods to improve & maintain optimal indoor air quality in your facility. The suite of services performed effectively neutralizes harmful particles & pathogens while continuously monitoring the ambient conditions.

HVAC CLEANED & RESTORED:

All of the HVAC units are hygienically cleaned with PURE-Steam™ using 350° F steam. Then restore them with anti-microbial paint as part of the HVAC New Life™ process.

PARTICLES REDUCED:

All of the supply & return ductwork is hygienically cleaned with the PURE-Duct service incorporating negative air machines with HEPA filtration. Fiberglass ductboard is also encapsulated to prevent degradation.

PATHOGENS NEUTRALIZED:

PURE-Decon building disinfection is conducted using EPA registered disinfectants to neutralize all bacteria, mold & viruses (including coronavirus) prior to the facilities being certified.

AIR PURIFICATION:

Air purifiers with EnviroSmart™ detection technology & multi-stage HEPA filtration and/or PURE-Plasma bi-polar ionization are installed in the building for the continuous cleaning of the air to remove allergens, microbes, odors & particles.

CONDITIONS MONITORED:

Baseline environmental (including for COVID-19 or Coronavirus and HVAC testing is done to verify building safety. IAQ Guard is installed to monitor/alert the facility 24/7 for particles, temperature, rH, CO2 & VOC.
